## 1. Entering Belgium

If you are arriving from outside of Belgium, check the rules that apply to you on <https://www.info-coronavirus.be/en/travels/>.

Everyone must complete the Passenger Locator Form (PLF).

## 2. Access to parties, saunas, bars and restaurants in Brussels

You need to present a **Belgian Covid Safe Ticket (CST)** or a **European Digital COVID Certificate**, together with an identity document (not a copy).

If your country is not part of the EU, but the EU has recognized your COVID-19 Certificate, make sure to bring the International Certificate that is recognized by the EU, because it usually is different from your National Certificate.

The COVID-19 Certificate should contain a QR code that will be scanned at the entrance of each party.

### What if you don't have this?

If you live outside the EU and have been vaccinated with one of the 4 EU recognized vaccines (Pfizer, Moderna, AstraZeneca or Johnson & Johnson/ Janssen), you can send a scan of your passport, your Vaccination Certificate and your phone number to <https://www.bruxelles.be/covid-safe-ticket> to receive your CST.

If you do not have a Belgian CST or a Vaccination Certificate that is recognized, **then you will need to do a test.**

This can be easily done at the **NIGHTLIFE TESTING CENTER** at Place Poelaert, between 17:00 and midnight on Friday, Saturday and Sunday (29, 30, 31 October).

The cost is €15 per test (€20 after 22:00) and it takes up around 1h to get the result via email or SMS.

The result of the test is valid until midnight of the following day that the test was taken.

For example : a test taken on Friday will allow you to enter on Friday, but also on Saturday, **as long as you enter before midnight.**

Make sure that you arrive ahead of time before midnight!

## **There are 2 ways to download your certificate after the test:**

- 1) Go to <https://www.masante.belgique.be/> (english language available)
- 2) Under 'NEWS', click on 'Test result and Certificate from a CTPC code'
- 3) Enter the 'CTPC-code'. This is the COVID-19 Test Prescription Code, which consists of 16 digits/letters. You will receive it on the mobile number that you gave. If you provided an email address, you will also receive the code via email. Please note that you will only receive the CTPC code via email and not your certificate.
- 4) Enter the last 4 digits of your mobile number in the field below the code field.

## **OR**

- 1) Download and install the **CovidSafeBE App** on your phone
- 2) Go to the tab 'Tests', click on 'Receive certificate via 'CTPC''
- 2) You will see the text: 'CTPC code -Retrieving certificates with a CTPC is only possible for people who do not have a national register number or a BIS number. Do you have a national register number or BIS number?' Click on 'No'.
- 3) Enter the CTPC-code and the last 4 digits of your mobile number.
- 4) Your certificate will be available in the app.

## **!!! TIP!!!**

## **If you have a QR Code, you can check yourself its validity !!!**

Download the CovidScanBE App on your phone and scan your own QR code, and you will immediately see whether you need to get tested or not to get in.
